THIS IS UNEVALUATED INFORMATION

Radar No. 1 at Mlada Airfield (See Memory Sketch, page 2)

1. The radar station, referred to as Radar No. 1, was a rectangular, permanent installation with netting type background. The antenna measured three meters horizontally and 4.5 m. vertically; it was 0.5 m. thick. Source never saw it rotate. The antenna was mounted on a two-meter-high mast imbedded in a concrete base. A wooden hut, 3 x 3 x 3 m., was dug into the ground near the radar set. [REDACTED] its distance from the radar. The hut had a gable roof, about 50 cm. above the ground, which was sown with grass. [REDACTED]

[REDACTED] unable to tell whether the radar operated 24 hours daily. One guard, armed with a 9mm submachine gun, was on 24-hour duty. Source had no further information.

25X1X Radar No. 2 at Mlada Airfield (See Memory Sketch, page 3)

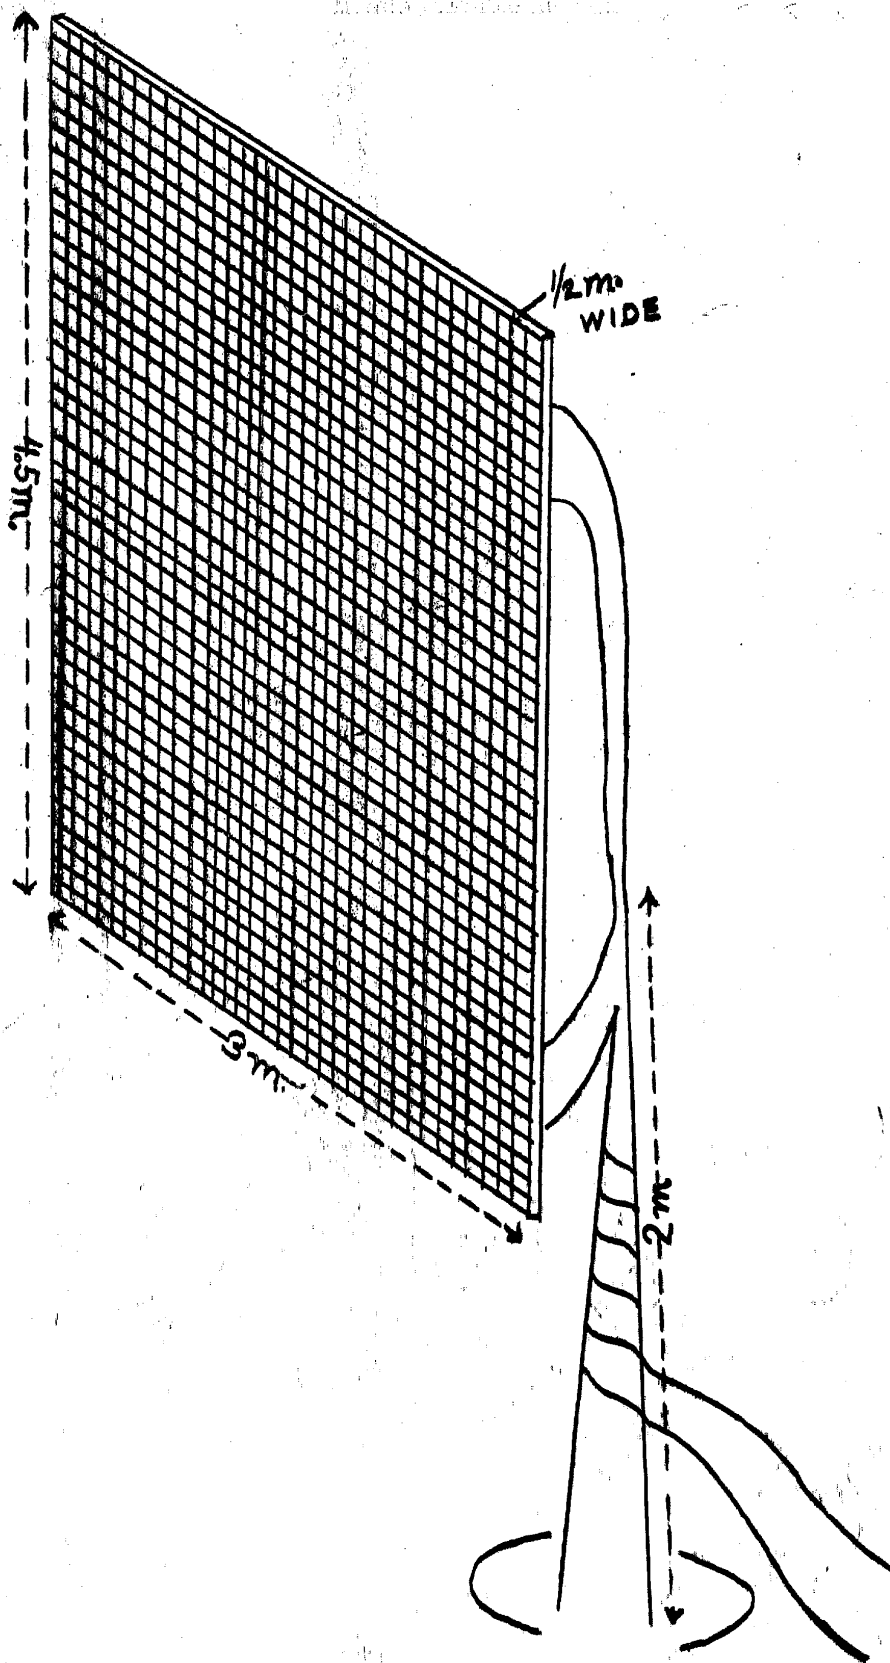

2. The radar station, referred to as Radar No. 2, was a bowl type radar. [REDACTED] The bowl was circular, three meters in diameter, with circular netting in front and solid metal semi-spherical back. The bowl was mounted on a rod, two meters high and 50 cm. in diameter, which was imbedded in a concrete base, 1.75 m. in diameter. A wooden hut, 3 x 3 x 3 m., was located about 10 m. from the radar. Source was never inside the hut. One guard, armed with a 9mm submachine gun, was on 24-hour duty. The radar rotated 180 degrees, irregularly, usually only during flying time. Source had no further information.
